

Studies have shown that early response to a critical emergency such as a heart attack, workplace injury, or sudden cardiac arrest can have a beneficial influence on patient outcome. Training your workforce to provide care in the critical moments while waiting for the ambulance to arrive is essential. Our programs are taught by experienced educators and medical professionals as part of the Emergency Care and Safety Institute (ECSI).

ECSI is the fastest growing international training organization of its kind, with over 1,200 Educational Centers. ECSI programs are offered through a partnership between the American Academy of Orthopedic Surgeons (AAOS) and the American College of Emergency Physicians (ACEP), two renowned medical organizations standing behind the content of ECSI materials. ECSI training leads to certifications that meet job related requirements as defined by regulatory authorities such as OSHA, JCAHO, and state offices of EMS, Education, and Health. ECSI materials are published by Jones and Bartlett Publishers.

FIRST AID **\$23/\$35**

Course # 400001

Everyone should be able to perform first aid, as most people will eventually find themselves in a situation requiring it, either for another person or for themselves. First Aid, is a dynamic course for those who want first aid training without the CPR and AED component

FIRST AID, CPR, AND AED **\$40/\$50**

Course # 400002

First Aid, CPR, and AED Standard, includes in-depth coverage of First Aid, CPR, and AED training in one comprehensive program. This is the new "standard" by which other emergency care training programs are judged.

CPR AND AED **\$30/\$35**

Course # 400003

Integrates the training of CPR and AED into one simple program. This program teaches basic life support and addresses breathing and cardiac emergencies in caring for adults, children, and infants. It is also designed to facilitate the efficient training, testing, and retesting in the use of automated external defibrillators (AEDs).

PROFESSIONAL RESCUER CPR **\$37/\$50**

Course # 400004

Provides individuals who have a job-related duty to respond to emergencies with the knowledge and skills to recognize and provide care in respiratory and cardiac emergencies. These skills include: performing two-rescuer CPR and techniques for special rescue situations; using resuscitation masks and bag-valve masks for ventilating victims; proper use of an Automated External Defibrillator (AED).

BLAST! BABY SITTER LESSONS AND SAFETY TRAINING **\$40**

Course # 400005

BLAST! (Baby sitter Lessons and Safety Training) is an important training program for potential baby sitters and parents considering hiring a baby sitter. The BLAST! program is exciting and interactive, providing extensive training in pediatric first aid, household safety, and the fundamentals of childcare.

PEDFACTS **\$40**

Course # 400006

The American Academy of Pediatrics (AAP) is pleased to bring you Pediatric First Aid for Caregivers and Teachers (PedFACTs), a new national pediatric first aid course. The PedFACTs course is designed to give caregivers and teachers the education and confidence that they need to care effectively for sick or injured children. This participant manual is the core of the PedFACTs course with features that reinforce and expand on the essential information. Each topic is divided into three sections: What You Should Know; What You Should Look For; What You Should Do.

These courses are offered as demand arises. If you, or your company, is interested in any of these please contact us to learn if there is an upcoming course or to have the course offered at your location.
