

Geriatric Education FOR Emergency Medical Services

The proportion of the aged in society today is greater than ever before, and growing faster than any other segment of our population. Current indications are that approximately 34% of calls for emergency medical services, or 3.4 million emergency responses involve patients over the age of 60. GEMS represents the most credible and complete source of prehospital medical information for older adults. It is an innovative, comprehensive, and highly visual course with:

- Case-Based Lectures
- Live Action Video
- Hands-on Skill Stations
- Small Group Scenarios

GEMS BLS

Course # 200004

An 8-hour course that offers the first responder and EMT material appropriate to them.

\$85/95*

GEMS ALS/COMBINED BLS COURSE

Course # 200005

A 16-hour course is appropriate for ALL levels of care and beneficial for EMTs to learn what ALS does. EMTs taking this course will be given the BLS exam and certification, as well as additional CME hours.

\$95/110*

* Tuition based upon price of textbook if purchased through LPCCN although not required. What IS required is that EVERY student have the textbook while in the course. Deduct \$30 from the tuition if a book is not required.
