

ITLS

International Trauma Life Support

ITLS, formally BTLS, is accepted internationally as the standard training course for prehospital trauma care. It's used as a state-of-the-art continuing education course — and as an essential curriculum in many paramedic, EMT and first-responder training programs.

ITLS courses combine classroom learning and hands-on skill stations. Scenario assessment stations enable you to put your learning to work in simulated trauma situations. ITLS courses are designed, managed and delivered by course directors, coordinators and instructors experienced in EMS, prehospital care and the ITLS approach.

Each ITLS course includes a comprehensive manual sent to you in advance. The manual enhances your learning experience with in-depth content, photos and illustrations. ITLS manuals are written by trauma care experts and edited by the ITLS editorial board. After the course, you can turn to the manual as a valuable recap of what you've learned.

ITLS empowers EMS personnel with the knowledge and skills to provide optimal care for the injured in the prehospital setting. We offer a variety of training options to suit the requirements of all levels and backgrounds of prehospital emergency personnel around the world.

ITLS COMBINED BLS/ALS

\$170/\$190*

Course #: 200003

A 16-hour course that offers the first responder and EMT material appropriate to them.

* Tuition based upon price of textbook if purchased through LPCCN although not required. What IS required is that EVERY student have the textbook while in the course. Deduct \$40 from the tuition if a book is not required.
