they're only scary on halloween

“Medic 6, you need to respond to 13 Pedi Drive for a 2-year old not breathing.”

What goes through you head when you get that call?

If it has something to do with punching out early you are not alone. Many EMS providers feel very uneasy with pediatric calls, but they shouldn't. If the provider understands the physical and cognitive developmental milestones while utilizing a pediatric assessment tool they should be able to quickly determine the nature of illness.

This presentation will address these as well as discuss one of the most common reasons 911 is activated: respiratory complaints.

KIDz

\$120 PER CLASS

Course # 300008

This is a 3-hour program that is appropriate for all levels of care.
